SUMMARY

Frontend-focused Full-Stack Developer with hands-on industry experience building enterprise and personal web applications. Previously interned at Bluebik Digital delivering a high-value transaction system. Strong foundation in UI engineering with working knowledge across the full stack — graduated First-Class Honours (GPAX 3.51) and received the Excellent Presentation Award at AUCC2025.

EXPERIENCE

Developer Intern Bluebik Digital Company Limited *May 2025 – 2026*

Project: High-Value Transaction System

- Built User Management and Admin modules with Role-Based Access Control (RBAC) per SA documentation.
- Engineered reusable components from Figma mockups (Next.js, Tailwind CSS, Shadcn UI), cutting UI dev time ~30%.
- Managed global state with Zustand; optimised fetching and caching with TanStack Query and Axios.
- Implemented client-side validation using Zod schemas to prevent malformed API payloads.

PROJECTS

Tiwgun (ติวกัน) Personal Project *2026*

Stack Next.js 16 · React 19 · TypeScript · Supabase · Shadcn UI · Zustand · TanStack Query · GSAP · Zod · Jest

- Bilingual (EN/TH) platform for sharing past exams and study materials — upload, search, likes, user profiles, and full admin moderation panel.
- Hybrid Encryption (RSA-OAEP + AES-GCM) via Web Crypto API for Perfect Forward Secrecy.
- Sub-800 ms TTFB via React Server Components, granular caching, and TanStack Query.
- Built primarily with AI-assisted development — architecture decisions, component structure, and security implementation guided by AI collaboration.

SaadMap Crowdsourced Real-Time Map · Personal Project *2026*

Stack React 19 · Vite · TypeScript · Leaflet · OpenStreetMap · Firebase Realtime Database · Shadcn UI · Zod

- Crowdsourced map allowing real-time pin drops (floods, checkpoints, traffic, medical) with 10-second refresh, upvoting, geolocation, and auto-expiry.
- Built primarily with AI-assisted development — architecture, component design, and Firebase integration.

Market Analysis Bot Automated Financial Analysis · Personal Project *2026*

Stack Python 3.11 · yfinance · pandas · Groq AI (LLaMA 3.3-70B) · LINE Messaging API · GitHub Actions

- Sends Technical Analysis reports via LINE 3×/day covering stocks, gold, crypto, and Forex — full indicator suite (RSI, MACD, BB, EMA, ATR) with real-time price alerts.
- Thai-language AI narrative powered by Groq LLaMA 3.3-70B; project built primarily with AI-assisted development.

Harkun Expense Splitter · Personal Project *2026*

Stack Next.js 16 · React 19 · TypeScript · Tailwind CSS 4

- Group expense splitter with equal, custom-amount, and percentage modes. Smart settlement algorithm minimises transfers; sessions shared via URL.
- Built primarily with AI-assisted development for rapid prototyping and clean architecture.

MyPhotoBooth AI Photo Editing & ID Photo Generator · Personal Project *2025*

Stack Next.js 16 · React 19 · TypeScript · @imgly/background-removal · Tailwind CSS 4 · Vercel Analytics

- Dual-mode web app: CuteBooth (filters/overlays) and ID Photo Generator (standard sizes, selectable backgrounds). On-device AI background removal — no server upload. EN/TH bilingual.
- Built primarily with AI-assisted development; leverages on-device AI model for real-time background removal.

E-Commerce & Expense Management Platform Group Project (Team of 4) *2024*

Stack Angular · Node.js · Express.js · SQL Server

- Full-stack e-commerce platform with relational SQL Server schema for users, products, and transactions — delivered iteratively in Agile sprints.
